

) Regarding Mr Simon Cordell information:
) New Complaint Dated: 28/11/2018

Dear Jinjer Kandola

Thank you for the update letter regarding the complaint that was submitted to Angela Hague on the 30th July 2018 and Rachel Vona on the 10th August 2018.

I am very happy that you take the over-sharing of information very seriously, but it would seem that the sharing of my son's information has not stopped by the mental health teams, and is being continually breached even after I put in the complaint the mental health trust is continually passing information to Enfield Council. It would seem if Enfield Council ask for anything it is being passed to them from the mental health team.

There has been a lot of data that is being passed between the mental health trust and Enfield Council this needs to stop, as no consent has ever been given by my son or my son asked if this information can be shared.

It would also seem Enfield Council has not learned anything as they are still sharing said information that is being shared via the mental health team to Enfield Council.

Please see attached email this time it seems it has come from Debbie Morgan who works in the same said department as Angela Hague where the last breach of data happened.

The information was sent to Enfield Council by Debbie Morgan and then Denise Cook-Smith from Enfield Council who is a Note Taker it would seem, then passed it over to the MP's aid Alev Cazimoglu who is trying to address a move from Enfield Council for my son and it seems the only person trying to help my son. The move was ordered via the courts on the 09/08/2018 which Enfield Council has failed to do, it seems Enfield Council will stop at nothing not to do the right thing towards my son. And seems they are only interested in using his mental health and not doing the correct thing and moving my son from the hell he is living in, everything the mental health team is passing to Enfield Council is being used against my son not to help him.

I would like the full details of what was passed to Enfield Council by the Mental health team from Debbie Morgan as it would not surprise me if Enfield Council has changed it to the

words they wanted to use to send it to the MP as what is stated in the Email to the MP is not correct on many points and I am very angry it has been written this way as no one has any right to say the things that have been said in the email the way they have been said is plainly wrong why would anyone write this email the way it has been written.

I would like this investigated as it seems the 1st investigation has done nothing to stop this sharing of my son's information without consent via the mental health team.

What right and laws are being used to share this information?

As it seems all the information that is being shared goes against my son. How is any trust meant to be gained when this is happening all the time? This is not the only information that is being shared and I can prove this.

I want all information sharing to stop forthwith with Enfield Council from the mental health teams across all departments, as it seems Enfield Council does not care how this information is being used or shared or if it is correct when they pass it on. From this point if any information is going to be shared with Enfield Council then the information needs to be sent to this email 1st and written consent obtained before any information is shared this would include all departments in the mental health team.

I have included your letter of response as I am also including in this email the MP as all this incorrect information that is being used against my son needs to stop from this point in time.

I have submitted a subject access request of all data being held for my son by the mental health teams, which I am awaiting as I need to correct a great deal of data being held and find out what other information has been shared.

I look forward to hearing from you regarding this complaint dated 28/11/2018

Regards

Lorraine Cordell
